

Software commissioning manager (m / f)

Job description

- The planning and preparation for coming projects is carried out by you in-house
- You will then lead the commissioning of the designed systems on site and make sure that testing events are executed on schedule
- You coordinate with the customer and colleagues with regard to the test scenarios to be carried out
- Communicate with the other company departments to ensure commissioning documents are created in accordance with applicable commissioning requirements.
- The test monitoring (quality and deadlines) is supervised by you in coordination with the commissioning plan on site. Prob
- Provide input and insight to the overall commissioning plan to the Project Manager

Qualifications

- You have experience in handling software or/and intralogistics projects
- Experience in performing and coordinating FAT (Factory Acceptance Test) Integrated Site Acceptance Test and any other witness events
- Experience in on-site software / hardware version control, verification and validation
- Your project start-up skills are good and you have gained experience in leading international teams
- Experience in software tests and IT hardware would be an advantage
- You can lead people well through your communication skills
- Knowledge of WMS (Warehouse Management System) or WCS (Warehouse Control System) would be an advantage for you
- You are characterized by very good English skills
- Your willingness to travel internationally is more than 50% of your working hours
